**Graph I: Final Results: 2006-2013 : Stock/bond-Cash Ratio Nominal**

SSA: Strategic Stock Accumulation    PR: Proportional Rebalancing    AS: All Stock Portfolio

Strategic Stock Accumulation Strategy, SSA ( all three top lines-maroon shades), outperformed both Proportional Rebalancing, PR (all three green shades) and the All-Stock, AS, (blue shade) at all three Stock/bond-Cash ratios (65/35, 50/50, and 35/65) by testing endpoint 2013, year-end.

The 50/50 SSA Stock/Bond-Cash ratio briefly drops below the other two strategies during part of 2009-2010, as large amounts of crash-driven stock purchases took place. By mid-2010, however, the large amount of stock bought "on sale", drove the strategy above both of the other two. For example, by 2013 the 35/65 SSA Strategy outperformed the 35/65 PR Strategy by 37%.

**Graph II: Final Results: 1999-2006 : Stock/bond-Cash Ratio Nominal**

SSA: Strategic Stock Accumulation    PR: Proportional Rebalancing    AS: All Stock Portfolio

The Proportional Rebalancing Strategy (PR) keeps pace with the Strategic Stock Accumulation Strategy, at all three Stock/ Bond-Cash ratios until 2003-2004, as the crash-driven SSA Strategy stock purchases of all three SSA portfolios begin to benefit from the stock market retracing back up to and beyond pre-crash levels. By the end of 2004, all three SSA portfolio ratios pull ahead of all other strategies at all three ratios. The 35/65 SSA Strategy outperformed the corresponding 35/65 PR Strategy by 27.2%; the 65/35 SSA Strategy outperformed the 65/35 PR Strategy by 11.5% (cumulative returns)

**Graph III: Final Results: 1972-1988 Stock/bond-Cash Ratio Nominal**

SSA: Strategic Stock Accumulation    PR: Proportional Rebalancing    AS: All Stock Portfolio

Because of stock market crash/corrections, stock was bought as per the Buy Rules of the SSA Strategy in '73, '74, and '81. This allowed the SSA Strategy to significantly outperform the other two back-tested strategies actually by 1982, and much more significantly, by 1988, year-end.

For example, the 50/50 SSA strategy outperformed the 50/50 PR Strategy by 50.5%; the 35/65 SSA Strategy exceeded the 35/65 PR return by 53.4%. The SSA Strategy out returned the AS Strategy at all three SSA ratios over this total time period.

**Graph IV: Final Results: 1928-1939 Stock/bond-Cash Ratio Nominal**

SSA: Strategic Stock Accumulation    PR: Proportional Rebalancing    AS: All Stock Portfolio

All of the Bond-Cash portion of all three SSA ratio strategies was used up buying stock in 1929, 1930, and 1931. By mid-1936, these earlier crash related stock purchases allowed all three SSA Strategies to forge ahead of the other two strategies, so that at the 35/65, 50/50, and 65/35 SSA ratio strategies they each exceeded the PR corresponding returns by 25.2%, 16.4%, and 10.8%. SSA 35/65 ratio strategy outperformed the All-Stock, (AS) Strategy by 66.4% during this time period, showing more clearly how a severe stock market crash (like the "Great Depression") can devastate an All-Stock portfolio for a long period of time.

## Graph V: Final Results: 1988-1999 Stock/bond-Cash Ratio Nominal

1988 figures cumulative back to 1972

SSA: Strategic Stock Accumulation    PR: Proportional Rebalancing    AS: All Stock Portfolio

The years between 1994 and 1999 were fantastic for an All-Stock portfolio, as there were no market crashes or corrections, showing the power of an All-Stock portfolio during such a strong uninterrupted bull run. The SSA (Strategic Stock Accumulation) 65/35 portfolio however, kept pace very well, in spite of its contrary power as a bear market strategy, being exceeded by AS by only 1.7%. SSA outperformed PR at the 65/35, 50/50, and 35/65 ratios by an astounding 47.8%, 91%, and 105.4% at the corresponding PR ratios.

## Graph VI: Final Results: 1999-2013 Stock/bond-Cash Ratio Nominal

1999 figures cumulative back to 1972

SSA: Strategic Stock Accumulation    PR: Proportional Rebalancing    AS: All Stock Portfolio

The beginning 1999 totals for all three strategies are cumulative back to 1972. As is apparent from those beginning numbers, there were already large differences up to that point, between the PR Strategy, and the other two back-tested strategies, SSA and AS, the PR Strategy lagging significantly. The final 2013 results show the superiority of the Strategic Stock Accumulation Strategy, SSA, (three maroon shades), over the All-Stock Strategy, AS (blue shade), and the Proportional Rebalancing Strategy, PR, (three green shades).

All three SSA ratio Strategies outperformed all four other ratio strategies (three PR and one AS). The 65/35 SSA (Strategic Stock Accumulation) Strategy outperformed the AS, All-Stock Strategy by 12.2% with much lower risk over the entire 41 year period. As the graph shows, the average of the three SSA Strategies exceeded the PR returns over this 41 year period by approximately 114%. This fact alone should give a long-term investor serious pause before considering Proportional Rebalancing as a long-term strategy.
